

CASE STUDY

Aga Khan Museum Builds a Clear Roadmap for Future-Ready Technology Infrastructure

Edgeworx helped the Aga Khan Museum assess its IT infrastructure and define priorities for long-term technology planning.

CLIENT: Aga Khan Museum

AGA KHAN MUSEUM

INDUSTRY: Museums

SERVICES: IT Audit, IT Consulting & Projects

Executive Summary

The Aga Khan Museum needed a methodical way to evaluate its technology infrastructure, enhance operational processes, and prepare for future business requirements. Edgeworx Solutions performed an IT Infrastructure Assessment and delivered a detailed findings report, clear recommendations, and prioritized guidance to support long-term technology planning.

Challenges

- The organization needed a clearer view of current IT infrastructure and improvement priorities.
- Technology planning had to support future business requirements across museum operations.
- Leadership needed clear recommendations to guide infrastructure decisions with confidence.
- Operational processes required better alignment with the organization's technology direction.
- The museum needed a methodical long-term strategy rather than fragmented planning.

Solutions

- A comprehensive assessment report gave leaders a documented view of infrastructure findings.
- Clear recommendations translated assessment insights into practical technology planning guidance.
- Prioritized actions helped the organization focus on the most important infrastructure needs first.
- A long-term technology strategy supported more methodical planning for future requirements.
- Strategic guidance connected technology infrastructure decisions to operational improvement goals.

"Edgeworx Solutions performed an IT Infrastructure Assessment and long term strategy to enhance the organizational operation processes and update the technology to meet future business requirements. At the end of the project, Edgeworx delivered ad detailed report on their findings, with clear recommendations and priorities that produced for the Aga Khan Museum and the Ismaili Centre a highly methodical long-term strategy associated with our technology infrastructure. We greatly recommend the Edgeworx services to other Museum Institutions that are looking to enhance their technology Infrastructure."

Aga Khan Museum

Edgeworx Solutions's Approach

Key Actions:

- Performed an IT Infrastructure Assessment to evaluate the existing technology environment.
- Reviewed operational processes to understand how infrastructure supported organizational needs.
- Identified infrastructure gaps and planning priorities tied to future business requirements.
- Developed a detailed findings report with clear recommendations for leadership review.
- Structured priorities into a long-term strategy for the Aga Khan Museum and the Ismaili Centre.

The Result

- Leadership gained greater clarity into infrastructure needs and future technology direction.
- The organization received clear priorities to guide technology planning and investment decisions.
- The assessment created a stronger foundation for aligning IT with future business requirements.
- A methodical long-term strategy helped reduce uncertainty around infrastructure modernization.
- The engagement earned a positive recommendation of Edgeworx's services to museum institutions.
