

CASE STUDY

Building a Clear Long-Term IT Strategy for McMichael Canadian Art Collection

Edgeworx assessed McMichael's infrastructure, clarified gaps, and prioritized a long-term technology roadmap.

CLIENT: McMichael Canadian Art

INDUSTRY: Cultural Institution

SERVICES: IT Audit, IT Consulting & Projects

Challenges

- McMichael needed an independent view of its current infrastructure environment before planning.
- Technology purchases needed to align with long-term operational and security requirements.
- Infrastructure gaps had to be identified clearly before future investments could be prioritized.
- Operational processes required review to ensure technology decisions supported organizational needs.
- The team needed a structured strategy to maximize value from corporate technology investments.

Solutions

- A current-state infrastructure review gave leadership a reliable baseline for long-term planning.
- A gap assessment clarified where the environment needed attention before future purchases.
- Prioritized recommendations connected technology investments to operational and security needs.
- Strategic guidance supported a long-term approach to maximizing corporate technology value.

“During the spring of 2021, Edgeworx Solutions Inc performed an in-depth study of the McMichael Canadian Art Collection infrastructure environment to build a long-term technology strategy associated with the McMichael’s technology purchases, operational processes and security requirements.

The assessment’s deliverable provided a highly comprehensive current environment review, clearly outlined gaps and prioritized recommendations for our long-term approach to maximize the value from our corporate technology investments. The Edgeworx team are professional, experienced and certified; the McMichael team gained a tremendous amount of value throughout the assessment project.

The McMichael highly recommends the Edgeworx team for any organization looking for a 3rd party assessment of their IT infrastructure to build a long-term technology strategy.”

Lisa Pottie

McMichael Canadian Art Collection

Executive Summary

McMichael Canadian Art Collection needed a clear view of its infrastructure environment and a long-term strategy for technology purchases, operations, and security requirements. Edgeworx Solutions Inc conducted an in-depth assessment, identified gaps, and delivered prioritized recommendations to help maximize technology investment value.

Edgeworx Solutions’s Approach

Key Actions:

- Conducted an in-depth study of the existing infrastructure environment in spring 2021.
- Reviewed current technology operations to understand process needs and investment priorities.
- Assessed security requirements as part of the broader long-term technology planning effort.
- Identified gaps across the current environment and translated findings into clear priorities.
- Delivered a comprehensive assessment with recommendations for future technology decisions.

The Result

- McMichael gained a comprehensive understanding of its current infrastructure environment and needs.
- Leadership received clearly outlined gaps and prioritized recommendations for future planning.
- The team gained a stronger basis for technology purchases, operations, and security decisions.
- The assessment helped reduce reliance on reactive planning by creating a long-term strategy.
- McMichael reported tremendous value and highly recommended Edgeworx for third-party assessments.
